NORTHWEST ANIMAL HOSPITAL

3506 N. 72nd Street Omaha, NE 68134 402-572-1280

To our Clients at Northwest Animal Hospital,

In the interest of your pet's optimum health, we are now providing a Senior Care Program to screen for diseases that occur as a result of increasing age. Many of these medical conditions can be detected with screening tests long before symptoms are seen. As a result of early detection, your pet can be treated with greater success than if treatment is delayed until symptoms are outwardly visible.

The staff at NORTHWEST ANIMAL HOSPITAL is genuinely interested in keeping your pet as healthy as possible for as long as possible. Following is an explanation of what the Senior Care Program will entail. There are different options available depending on the needs of your senior pet. We will discuss the options and help you decide what will best suit your pet.

Gold Option:

- -Comprehensive Physical Examination (recommended twice yearly)
- -Complete Blood Count- tests for signs of infection, anemia, and other disorders
- -Comprehensive Blood Tests- tests for abnormalities in organ functions, sugar levels, cholesterol levels
- -EKG- checks heart rhythm and screens for specific heart conditions
- -Urinalysis- tests urine for many conditions including diseases such as diabetes
- -Stool Check

-Chest Xray

-Thyroid Profile

-Complete Dental Exam and Teeth Cleaning
